Who we are

Technovate is a software development company in Jaffna, Sri Lanka, founded in 2018. We design, build and support custom software, SaaS platforms, web and mobile apps and AI integrations for businesses in Sri Lanka and around the world, working in two-week iterations with code in repositories our clients own.

What we do

Custom Software Development: Bespoke platforms, internal tools and line-of-business systems.

Mobile App Development: iOS and Android apps in Swift, Kotlin, React Native and Flutter.

AI Solutions: LLM integrations, RAG pipelines, chatbots and automation.

E-commerce Development: Shopify, WooCommerce and custom storefronts with local payments.

Cloud & DevOps: AWS, Azure and Google Cloud: migration, infrastructure as code, CI/CD.

How we work

Discovery: Goals, users, systems and constraints.

Scope and plan: Written scope, timeline and proposal.

Design: Flows and designs agreed before building.

Build in two-week iterations: A demo of working software every two weeks.

Review, test and sign-off: Reviewed, tested and signed off by you.

Launch and support: Deployment, handover and ongoing support.

Technologies

Next.js · React · Vue.js · Laravel · Node.js · Swift · Kotlin ·
React Native · Flutter · AWS · Azure · Google Cloud ·
OpenAI GPT models · Anthropic Claude

Web Development: Fast, scalable web apps in Next.js, React, Laravel and Node.js.

SaaS & MVP Development: Multi-tenant SaaS platforms, and focused MVPs typically in 8 to 12 weeks.

POS & ERP Systems: POS and ERP with EPF/ETF payroll and local tax reporting.

UI/UX Design: Research-led product design, design systems and handoff.

Technical SEO: Technical SEO, structured data and Core Web Vitals.

What clients can count on

A reply within 24 hours on working days

A written scope before work starts

A demo of working software every two weeks

Reviewed, tested and signed off by you before launch

Code and designs in repositories you own

NDA's and IP assignment as standard

Ways to work together

Fixed scope: A defined scope, timeline and price.

Ongoing development: Monthly development time, priorities agreed each iteration.

Support retainer: Maintenance and improvements, agreed response times.
